Summary

Software Engineer at ING Bank with **8 years of experience**. Experienced with all stages of a software cycle providing solutions in architecture, development and maintenance of web and mobile applications. I like to study and apply the best practices, Data Structure, Clean Code, Tests, Design Patterns and always thinking in the tradeoffs I have made in my applications.

Experience

Software Engineer

June 2019 - **Current**

ING Bank – Amsterdam, Netherlands

- Providing mobile solutions in the FrontEnd Engineer Team, for IOs and Android with JavaScript, React, React Native, Java, Kotlin and Swift.
- Here I am working at the investment team, develop new solutions in the Beleggen app (ING Investing).
- With around 60k+ users our app grows fast with most modern pipeline, to guarantee the quality I am involved with TDD, Unit Tests, UI Tests, Pair Program and Code Review.
- As we are a bank and the security comes first. I am involved with a lot of Native Code in IOs and Android, working for performance the Bridges that communicate with JavaScript.
- IOs: <https://apps.apple.com/nl/app/ing-beleggen/id1231921275>
- Android: <https://play.google.com/store/apps/details?id=com.ing.investment>

Most Important Environment: **JavaScript, React, React Native, Git, Jest, TDD, Java, Kotlin, Swift, Flow for Type, Mobx...**

Full-Stack Developer

March 2015 to Current - **4 years**

Grupo Marquise – Fortaleza, CE Brazil

- Architected, Design, Develop and Maintain all-new Web and Mobile applications to streamline the company's processes.
- The leader of Five Developers, with extra responsibilities such as developing the company's core solutions, training Juniors Developers and bringing new technologies to the health of the company.
- Web and Mobile applications thinking in Mobile First. Always concerned with scalability, clean code, code review and trying to apply the best practices from the Open Source Community.
- My latest Application is a React-Native app for the biggest mall in my company in the city of Fortaleza. The app is responsible for processing thousands of payments from the vendors. The Mobile app is being developed and maintained by me. I have to help the team in the Web FrontEnd with ReactJS and some AngularJS with Java in the Backend.
